ROOT CAUSE ANALYSIS REPORT: INC-123

Status: DRAFT (Generated by Agentic Orchestrator)

Severity: High

Date/Time: 2026-05-25 15:30 UTC

1. Executive Summary

On 2026-05-25, an incident occurred resulting in high latency and 504 Gateway Timeout errors for API consumers. The automated Agentic AI Platform has analyzed logs, service metrics, and history databases.

The analysis concludes that **database connection pool exhaustion** on the backend microservice led to threads blocking, which eventually starved the API gateway.
